

COLLÈGE BÉLIVEAU

SCHOOL PLAN 2019-2020

Collège Béliveau's 2019-2020 School Plan mirrors the Louis Riel School Division's Multi-Year Strategic Plan (MYSP) in highlighting the four quadrants of Dr. Martin Brokenleg's Circle of Courage. Our goal this year is to foster, encourage and develop Belonging, Mastery, Independence and Generosity in all students and staff through day to day learning as well as school wide events and activities.

This year's school plan is illustrated by the following:

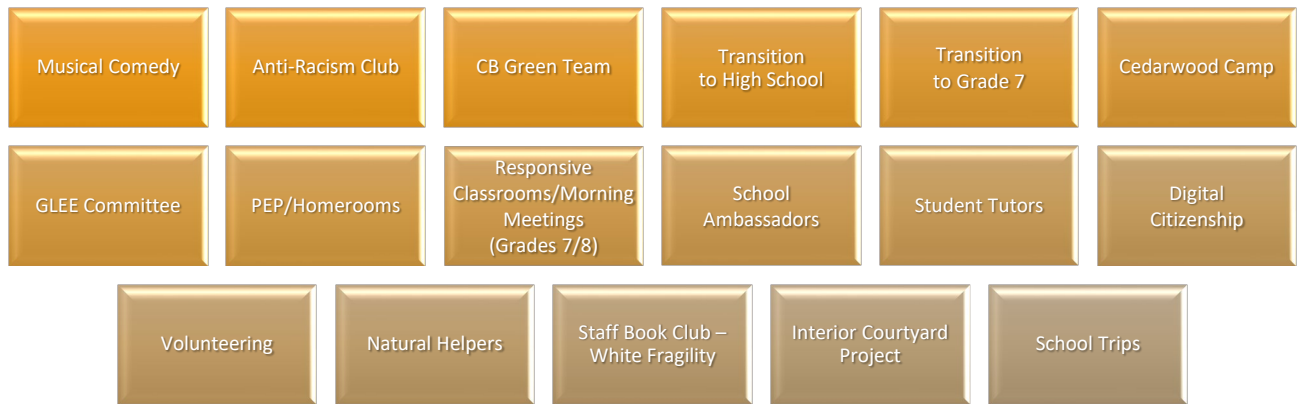

These themes are a continuation of last year's school plan and were identified as areas of concern in the Our School Survey (formerly Tell Them From Me school survey) data and in conversations with staff. They are also part of Collège Béliveau's vision and mission as a French Immersion High School in developing caring, responsible and resilient life-long bilingual learners.

A wide variety of activities for Students and Staff are organized throughout the year that target each of the above-mentioned themes. The following will be taking place or are currently underway at Collège Béliveau.

Citizenship / Appreciation of Diversity

As a learning community, our goal is to develop respectful, responsible and caring citizens while providing them opportunities to take on leadership roles, to step out of their comfort zones and encouraging them to give back to their community. We also strive to create a safe and welcoming learning environment for all its members. Staff and students are on a continuous learning and teaching journey to strengthen our appreciation of diversity, along with respect and empathy for one another.

Student Engagement

Students are regularly offered a wide variety of activities aimed at increasing their sense of belonging, to have fun while learning, to work and collaborate as a team. Students who get involved in events or activities inside and outside of the classroom feel a greater sense of well-being/inclusion, leading to increased academic and overall educational success.

Literacy / Numeracy

Educational Success

Construction identitaire / Conversational French

Students are continuously learning what it means to be an immersion student in today's ever-changing society. They are a part of the Francophone fabric of our country. Teachers create meaningful activities inside and outside of the classroom that target the development of this identity and their fluency in using this second language. All staff members work towards eliminating common errors in students' conversational French.

- Les erreurs non-négociables
- Activités de français parlé

Health and Well-Becoming

Our goal is to promote wellness and resilience in all our students. Physical wellness and Mental Health are equally important in achieving one's full potential. The ultimate goal for all students is to become autonomous and confident in all that they do.
