THE EDGE

PROFESSIONAL SKILLS

The LRATC staff are committed to developing comprehensive professional skills with all students in addition to the theory and practical components of their chosen program. The Edge program has been informed by our industry partners and was developed in response to those professional skills that are important to both gain and maintain employment. Each program will teach and assess professional skills based on the six pillars.

1 PROFESSIONALISM

2 COMMUNICATION

3 RELIABILITY & RESPONSABILITY

4 COLLABORATION & TEAMWORK

5 ORGANIZATION PLANNING & STRUCTURING

6 JOB SEARCH PREPARATION

These pillars can include, but are not limited to topics such as:

- Attendance and punctuality
- Communication skills
- Using technology in a professional manner
- Problem-solving skills
- Teamwork
- Customer relations
- Professional appearance
- Resume and interview skills

We believe that students who attend LRATC have gained an Edge in employment as they are prepared to enter the workforce immediately. The Edge is introduced and promoted throughout the school year, focusing on the development of professional skills that are needed in today's workforce.
