

POLICIES, GUIDELINES AND PROCEDURES

SUBJECT	N.E.P.N. CODE
COMMUNICABLE DISEASES	JLCC

I. POLICY

The Louis Riel School Division (LRSD) holds as paramount the health and safety of students and staff. Accordingly, the Division endorses responses to communicable diseases that:

- uphold legislated responsibilities;
- strive to minimize the impact of communicable diseases on students and staff;
- apply the most current and appropriate medical advice.

II. GUIDELINES

1. Since common routes of transmission of communicable diseases include droplets and direct contact with body fluids (e.g., human bites), LRSD staff shall treat all body fluids as potentially infectious and use appropriate procedures to avoid direct contact with such fluids.
2. The [Canadian Pediatric Society](#) will be used in all divisional schools and workplaces to determine responses to staff or students who are affected by a communicable disease.
3. To minimize risk, or as a preventative measure, it is recommended that all staff working with students who have a history of biting consult their healthcare practitioner regarding the advisability of vaccination against tetanus and/or hepatitis-B.
4. LRSD's administrative protocols [Managing Human Bites](#) and [Reducing Exposure to Blood-borne and Other Bodily Fluid Pathogens](#) will be used as a guide in applicable situations.

III. PROCEDURES

1. To minimize the spread of communicable disease, school staff will adopt routine preventative procedures and encourage students to do the same. This includes, but is not limited to, handwashing, staying home when ill, cleaning and disinfecting, and disposal of materials.
2. Where concerns regarding communicable disease exist, the School Principal or workplace supervisor shall ensure that legislated responsibilities are upheld:
