

Embrace Autumn at Oak Hammock Marsh

Outdoor experiences have positive impacts on child development and learning. The listed program options focus on connecting you with wetlands in a fun and interactive way, while ensuring everyone has a safe and comfortable experience!

Book up to 4 classes per day, (maximum 120 students) for the following program packages!

If you have extra time, add up to 30 minutes of free time to explore the museum galleries at no additional charge.

Package A - \$11.00 per student

Requires 3 to 4 hours

Migration Marshwalk

Discover the dangers these amazing athletes face on their marathon journey and the role wetlands play during a bird's migration while traveling along one of our many trails.

Critter Dipping

Head out onto the dock with a bucket and net to search for life under the water. Learn about the diversity of creatures we can find in the marsh, then use magnifiers to identify your critters.

Seasonal Changes

Plants and animals change throughout the year to survive. We will explore some of these that call the marsh home.

Package B - \$11.00 per student

Requires 3 to 4 hours

Migration Marshwalk

Discover the dangers these amazing athletes face on their marathon journey and the role wetlands play during a bird's migration while traveling along one of our many trails.

Critter Dipping

Head out onto the dock with a bucket and net to search for life under the water. Learn about the diversity of creatures we can find in the marsh, then use magnifiers to identify your critters.

Ecology Games

Learn about animal behaviours and interactions by playing high-energy, interactive games. Can be played inside, weather permitting.

To book a
fieldtrip!

Programming is both indoors and outdoors. Individual programs and custom packages are also available. In the case of severe weather, adjustments will be made to the scheduled programming to keep students indoors.

Wetland Ecology

Discover the importance of wetlands and the many factors that influence the overall health of a wetland ecosystem. Using a variety of tools, students will examine the living and non-living components of a wetland.

Book up to 3 classes per day, (maximum 75 students) for the following program packages!
Wetland Ecology programming is for grades 10 to 12 and is available September & October

Wetland Ecology Package A
\$13.00 per student
Requires 3 to 4 hours

Biodiversity Marshwalk

Explore the trails and discover why wetlands are so important to the many species that make our marsh their home.

Invertebrate Sampling

Grab a bucket and dip net, or even a dredge, to sample the waters, discovering the diversity of life. Strap on some chest waders to get an even closer look (water levels permitting).

Water Chemistry

Collect water samples and test them in our lab to better understand this key part wetlands.

Wetland Ecology Package B
\$14.00 per student
Requires 4 to 5 hours

Biodiversity Marshwalk

Explore the trails and discover why wetlands are so important to the many species that make our marsh their home.

Invertebrate Sampling

Grab a bucket and dip net, or even a dredge, to sample the waters, discovering the diversity of life. Strap on some chest waders to get an even closer look (water levels permitting).

Water Chemistry

Collect water samples and test them in our lab to better understand this key part wetlands.

Birding 101

Learn about the fascinating diversity of birds found at Oak Hammock Marsh with this introduction to bird identification.
